

```
# Open a file in write mode
fo = open("foo.txt", "w+")
print "Name of the file: ", fo.name

# Assuming file has following 5 lines
# This is 1st line
# This is 2nd line
# This is 3rd line
# This is 4th line
# This is 5th line

seq = ["This is 6th line\n", "This is 7th line"]
# Write sequence of lines at the end of the file.
fo.seek(0, 2)
line = fo.writelines( seq )

# Now read complete file from beginning.
fo.seek(0,0)
for index in range(7):
    line = fo.next()
    print "Line No %d - %s" % (index, line)

# Close opened file
fo.close()
```

When we run above program, it produces following result:

```
Name of the file:  foo.txt
Line No 0 - This is 1st line
```
