

	<p><b>SINGLE:</b> You can only select one line, and you can't drag the mouse. wherever you click button 1, that line is selected.</p> <p><b>MULTIPLE:</b> You can select any number of lines at once. Clicking on any line toggles whether or not it is selected.</p> <p><b>EXTENDED:</b> You can select any adjacent group of lines at once by clicking on the first line and dragging to the last line.</p>
width	The width of the widget in characters. The default is 20.
xscrollcommand	If you want to allow the user to scroll the listbox horizontally, you can link your listbox widget to a horizontal scrollbar.
yscrollcommand	If you want to allow the user to scroll the listbox vertically, you can link your listbox widget to a vertical scrollbar.

## Methods

Methods on listbox objects include:

Option	Description
activate ( index )	Selects the line specifies by the given index.
curselection()	Returns a tuple containing the line numbers of the selected element or elements, counting from 0. If nothing is selected, returns an empty tuple.
delete ( first, last=None )	Deletes the lines whose indices are in the range [first, last]. If the second argument is omitted, the single line with index first is deleted.
get ( first, last=None )	Returns a tuple containing the text of the lines with indices from first to last, inclusive. If the second argument is omitted, returns the text of the line closest to first.
