

pady	How much space to leave above and below the text of the menubutton. Default is 1.
relief	Selects three-dimensional border shading effects. The default is RAISED.
state	Normally, menubuttons respond to the mouse. Set state=DISABLED to gray out the menubutton and make it unresponsive.
text	To display text on the menubutton, set this option to the string containing the desired text. Newlines ("\n") within the string will cause line breaks.
textvariable	You can associate a control variable of class StringVar with this menubutton. Setting that control variable will change the displayed text.
underline	Normally, no underline appears under the text on the menubutton. To underline one of the characters, set this option to the index of that character.
width	The width of the widget in characters. The default is 20.
wraplength	Normally, lines are not wrapped. You can set this option to a number of characters and all lines will be broken into pieces no longer than that number.

## Example

Try the following example yourself:

```
from Tkinter import *
import tkMessageBox
import Tkinter

top = Tk()
```
