

```

R3 = Radiobutton(root, text="Option 3", variable=var, value=3,
                  command=sel)

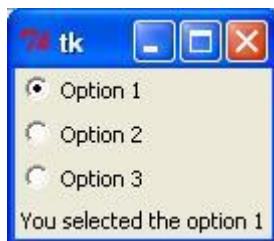

R3.pack( anchor = W)

label = Label(root)
label.pack()

root.mainloop()

```

When the above code is executed, it produces the following result:

## 12.Scale

The Scale widget provides a graphical slider object that allows you to select values from a specific scale.

### Syntax

Here is the simple syntax to create this widget:

```
w = Scale ( master, option, ... )
```

### Parameters

- **master:** This represents the parent window.
- **options:** Here is the list of most commonly used options for this widget. These options can be used as key-value pairs separated by commas.

Option	Description
activebackground	The background color when the mouse is over the scale.
