

```
print "Good bye!"
```

When the above code is executed, it produces the following result:

```
Current Letter : P
Current Letter : y
Current Letter : t
Current Letter : h
Current Letter : o
Current Letter : n
Current fruit : banana
Current fruit : apple
Current fruit : mango
Good bye!
```

Iterating by Sequence Index

An alternative way of iterating through each item is by index offset into the sequence itself. Following is a simple example:

```
#!/usr/bin/python

fruits = ['banana', 'apple', 'mango']
for index in range(len(fruits)):
    print 'Current fruit :', fruits[index]

print "Good bye!"
```

When the above code is executed, it produces the following result:

```
Current fruit : banana
```
