

state()

Returns the current state of the window. Possible values are normal, iconic, withdrawn and icon.

transient([master])

Turns the window into a temporary(transient) window for the given master or to the window's parent, when no argument is given.

withdraw()

Removes the window from the screen, without destroying it.

maxsize(width, height)

Defines the maximum size for this window.

minsize(width, height)

Defines the minimum size for this window.

positionfrom(who)

Defines the position controller.

resizable(width, height)

Defines the resize flags, which control whether the window can be resized.

sizefrom(who)

Defines the size controller.

title(string)

Defines the window title.

Example

Try following example yourself:

```
from Tkinter import *
```
