

```
statement(s)  
  
else:  
  
statement(s)
```

Flow Diagram

Example

```
#!/usr/bin/python  
  
var1 = 100  
if var1:  
    print "1 - Got a true expression value"  
    print var1  
else:  
    print "1 - Got a false expression value"  
    print var1  
  
var2 = 0
```
