

```
var = 10                                # Second Example
while var > 0:
    var = var -1
    if var == 5:
        continue
    print 'Current variable value :', var
print "Good bye!"
```

When the above code is executed, it produces the following result:

```
Current Letter : P
Current Letter : y
Current Letter : t
Current Letter : o
Current Letter : n
Current variable value : 9
Current variable value : 8
Current variable value : 7
Current variable value : 6
Current variable value : 4
Current variable value : 3
Current variable value : 2
Current variable value : 1
Current variable value : 0
Good bye!
```

Pass Statement

It is used when a statement is required syntactically but you do not want any command or code to execute.
