

## Parameters

- **master:** This represents the parent window.
- **options:** Here is the list of most commonly used options for this widget. These options can be used as key-value pairs separated by commas.

| Option           | Description   |
|------------------|---|
| bd               | Border width in pixels. Default is 2.   |
| bg               | Normal background color.  |
| confine          | If true (the default), the canvas cannot be scrolled outside of the scrollregion.   |
| cursor           | Cursor used in the canvas like <i>arrow</i> , <i>circle</i> , <i>dot</i> etc.   |
| height           | Size of the canvas in the Y dimension.  |
| highlightcolor   | Color shown in the focus highlight.   |
| relief           | Relief specifies the type of the border. Some of the values are SUNKEN, RAISED, GROOVE, and RIDGE.  |
| scrollregion     | A tuple (w, n, e, s) that defines over how large an area the canvas can be scrolled, where w is the left side, n the top, e the right side, and s the bottom.   |
| width            | Size of the canvas in the X dimension.  |
| xscrollincrement | If you set this option to some positive dimension, the canvas can be positioned only on multiples of that distance, and the value will be used for scrolling by scrolling units, such as when the user clicks on the arrows at the ends of a scrollbar. |
| xscrollcommand   | If the canvas is scrollable, this attribute should be the .set() method of the horizontal scrollbar.  |
| yscrollincrement | Works like xscrollincrement, but governs vertical movement.   |
