```
text.tag_config("start", background="black", foreground="green")

root.mainloop()
```

When the above code is executed, it produces the following result:

15.TopLevel

Toplevel widgets work as windows that are directly managed by the window manager. They do not necessarily have a parent widget on top of them.

Your application can use any number of top-level windows.

Syntax

Here is the simple syntax to create this widget:

```
w = Toplevel ( option, ... )
```

Parameters:

- **options:** Here is the list of most commonly used options for this widget. These options can be used as key-value pairs separated by commas.

Option	Description
bg	The background color of the window.
bd	Border width in pixels; default is 0.
cursor	The cursor that appears when the mouse is in this window.
class_	Normally, text selected within a text widget is exported to be the selection in the window manager. Set exportselection=0 if you don't want that behavior.
