Example

Try the following example yourself:

```
import Tkinter

import tkMessageBox

top = Tkinter.Tk()

def helloCallBack():

    tkMessageBox.showinfo( "Hello Python", "Hello World")

B = Tkinter.Button(top, text ="Hello", command = helloCallBack)

B.pack()

top.mainloop()
```
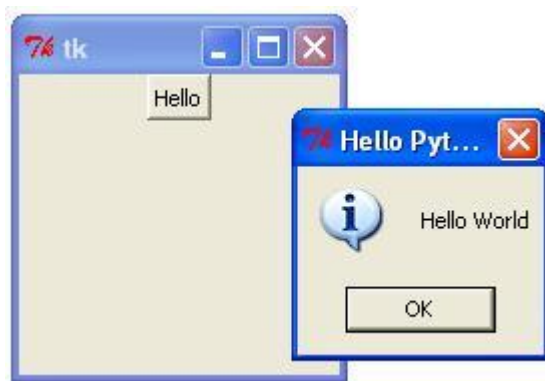

When the above code is executed, it produces the following result:

2. Canvas

The Canvas is a rectangular area intended for drawing pictures or other complex layouts. You can place graphics, text, widgets2. or frames on a Canvas.

Syntax

Here is the simple syntax to create this widget:

```
 w = Canvas ( master, option=value, ... )
```
