File Upload Example

To upload a file, the HTML form must have the *enctype* attribute set to **multipart/form-data**. The input tag with the file type creates a "Browse" button.

```
<html>

<body>

   <form enctype="multipart/form-data"

                    action="save_file.py" method="post">

   <p>File: <input type="file" name="filename" /></p>

   <p><input type="submit" value="Upload" /></p>

   </form>

</body>

</html>
```

The result of this code is the following form:

File:

Reset

Bottom of Form

Above example has been disabled intentionally to save people uploading file on our server, but you can try above code with your server.

Here is the script **save_file.py** to handle file upload:

```
#!/usr/bin/python

import cgi, os

import cgitb; cgitb.enable()

form = cgi.FieldStorage()

```
